

Your Confident Cyber Security Crew

Do you need a smarter response to the cyber risks that are threatening your business? From 360° Intelligent Security Operations to unique solutions for specific challenges, we are your confident cyber security crew. With more than 250 passionate people from all fields of cyber security, we are committed to keeping your digital journey safe.

Our Mission: Your Safe Digital Journey

Protecting your business is our daily mission. Our dedication to you is founded in the motivation of each and every Northwaver.

From ethical hacker to lawyer, cyber analyst to psychologist, programmer to business expert, CEO to receptionist, we all share a common goal. A safe digital journey for our free and modern world. This is why we push ourselves to be the best version of ourselves today and an even better version tomorrow.

We welcome you at Northwave and invite you to join our mission.

What makes us, us...

Whatever we do for you, you can rely on our dedication. All our services find their foundation in four distinctive aspects that form the Northwave signature.

✔ Driven By Intelligence

Everything we do is based on the latest information about threats, gathered, analysed and translated into concrete and immediate actions to protect your business at all times.

✔ Always Integrated

Only a holistic approach towards cyber risk mitigation delivers solid security. We understand the value and master the art of integrating business, bytes and behavior.

✔ Truly Informed

We make sure we understand your business, your culture and your context. Only by being extremely close, can we be a dedicated extension of your organisation.

✔ Independent By Nature

We are your second pair of eyes, bringing in an expert view on every aspect of how you are protecting your business. To put you in control beyond dispute.

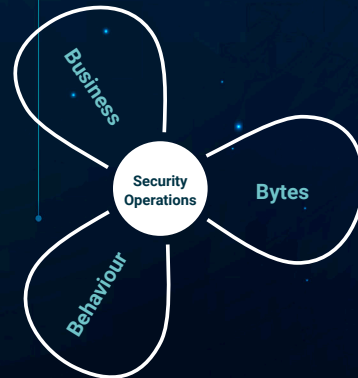

All Services

Our 360° Security Service

Intelligent Security Operations

Our Intelligent Security Operations enable you to remain in control of your cyber security. Together we mitigate your risks and reduce the impact of potential threats. From processes and procedures (Business) to technology (Bytes) and Behaviour, our integral approach to cyber security focuses on every aspect of your cyber protection, leaving you free to run your business.

Business

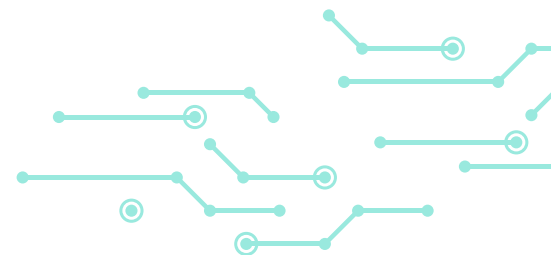

- **Security & Privacy Office**
We run and maintain your security & privacy management based on your threats and business risks.
- **State of Security Assessment**
We assess and test your cyber security from a Business, Bytes and Behaviour perspective and develop your cyber security roadmap to mitigate the risks that are present in your company.
- **Security Roadmap**
We create a risk-based, clear and actionable plan enabling you to improve your cyber security maturity.
- **Assess & Control**
We assess the accuracy, reliability and effectiveness of your information security on different norms and regulations.
- **ISO 27001 FastTrack**
We certify your cyber security in 6 to 9 months with our FastTrack solution. Afterwards, regular audits by our Security & Privacy Office ensure that you remain compliant.

Bytes

- **Managed Detection & Response**
We constantly monitor your information security from our SOC, cutting the time needed to detect and respond to potential threats and thereby minimizing their impact.
- **Rapid Response**
We guarantee that our Incident Response Team is ready 24/7 and that you are prepared to get your business back on track as fast as possible.
- **Adversary Simulation**
We test your business' biggest threats to help you improve company-wide cyber resilience and effectively manage cyber-attacks.
- **Pentest**
We put your applications and information security to the test with our team of ethical hackers.
- **Vulnerability Management**
We actively scan your cyber environment for known vulnerabilities as they appear and prioritise the remediation.

Behaviour

- **Managed Cyber Behaviour**
We enable your human firewall to strengthen your protection from within
- **Cyber Resilience**
We prepare you to recover from any cyber incident and handle incidents properly when they occur.

What Our Clients Say About Us

FUNKE Media Group

Only a few hours after the attack, the Northwave experts were here at our offices - this was extremely important for all of us, because we knew then that we were not alone in dealing with the problem. Today, we train the entire workforce on secure passwords and phishing emails. Trained end-users are the best firewalls for attacks. And, of course, we are investing significantly more in the topic of IT security. To defend against unavoidable attacks, we permanently rely on 24/7 monitoring by Northwave's experts.

Heiko Weigelt
Head of IT

Martin Wambach
Chief Digital Officer

Rödler & Partner

Rödler & Partner cannot - as no company can, if we are honest - manage its IT security amidst daily changing threat risks and attack patterns all by itself with on-board resources. We need a strong partner to permanently secure our global data traffic, identify threats and protect our systems. Northwave is an indispensable support for this.

Florian Haller
CEO and owner

Serviceplan Group

I appreciate it when Northwave's external experts look independently, like a second pair of eyes, at our processes and measures. That's why we rely on Northwave's SOC. Northwave's security experts provide me with peace of mind and additional security in operations, so I know that everything is at least double-checked and continuously monitored. This frees up our IT teams. In addition to the SOC, Northwave's Security Office provides us with many advantages. Everyone in the group can call on the experts for help with security issues, from questions to incident handling. In addition to technical measures, Northwave also assisted with our company's TISAX certification.

Certified Security You Can Trust

You can depend on us. We are ISO 27001 and ISO 9001 certified and are a recognised and accredited Incident Response Team and have the necessary permits for digital forensic investigation. We are co-founders of Cyberveilig Nederland.
